WORK EXPERIENCE

Python Developer Intern, Rubicon Foundation

Jan 2025 – Feb 2025

- Developed database-driven web applications using Python, Django, Django ORM, and MySQL.
- Designed relational database schemas and implemented backend operations while maintaining data integrity.
- Built REST APIs with authentication and authorization and improved reusable backend modules.

Software Developer Intern, Elite Software

Dec 2024 – Feb 2025

- Developed and enhanced Python and Django-based web applications by implementing backend features and resolving application issues.
- Worked with Agile development practices including sprint planning, code reviews, debugging, testing, and deployment.
- Improved backend logic and database interactions to support application reliability and maintainability.

PROJECTS

AI Resume Analyzer using Generative AI & NLP

[Live Demo](#) [GitHub](#)

Python, Streamlit, Google Gemini API, Scikit-learn, Pandas, NLTK

- Developed an AI-powered resume analysis platform using Google Gemini and NLP to evaluate resumes against job descriptions.
- Implemented ATS scoring, keyword matching, semantic similarity, AI-generated feedback, resume grading, and PDF report generation.

Predictive Maintenance & Equipment Failure Prediction

[Live Demo](#) [GitHub](#)

Python, Scikit-learn, Pandas, Gradient Boosting, Streamlit, SQL, Power BI

- Developed a machine failure prediction system using operating conditions including temperature, rotational speed, torque, and tool wear.
- Built and deployed a Streamlit application providing failure probability, risk classification, prediction history, and maintenance recommendations.

Retail Sales Analytics using SQL Server & Power BI

[GitHub](#)

Python, Pandas, SQL Server, Power BI, DAX

- Developed an end-to-end retail analytics solution covering data exploration, SQL database design, and business intelligence reporting.
- Built an interactive Power BI dashboard using DAX measures, KPI cards, sales trends, product analysis, regional analysis, and dynamic slicers.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Engineering

2022 – 2026

Honours Specialization: Data Science

CGPA: 7.55/10

Savitribai Phule Pune University

PUBLICATION

Automatic Vehicle Speed Control

Jun 2026

International Journal of Scientific Research in Engineering and Management (IJSREM) [DOI](#)

TECHNICAL SKILLS

Programming	Python, C++, Java, SQL
AI / Machine Learning	Scikit-learn, TensorFlow/Keras, Natural Language Processing, Generative AI, Google Gemini API
Data Science / Analytics	Pandas, NumPy, Matplotlib, Seaborn, Power BI, DAX, Microsoft Excel
Web / Databases	Django, Streamlit, REST APIs, MySQL, SQL Server, MongoDB
Tools / Concepts	Git, GitHub, Jupyter Notebook, VS Code, Object-Oriented Programming, Data Structures, Agile, SDLC
